

CRJ Execliner Conversion

It's a good feeling when you know you have made an exceptional business decision. Especially when it involves your personal comfort. That's why industry leaders the world over are choosing the CRJ ExecLiner Conversion - an inspired transformation that takes a traditional CRJ and converts it into a luxuriously appointed, customized business aircraft.

The transformation of your CRJ begins inside. We strip away the standard high density seating and create an open, spacious interior ready to satisfy your every need. Choose from a variety of layouts and options, including custom cabinetry, plush leathers and finishings, as well as personalized communication and entertainment systems.

For added convenience, we also enhance the ExecLiner with a certified auxiliary fuel system. The two new fuel tanks not only increase the jets range but provide superior performance as well.

As the industry leader in CRJ Executive conversions you can be assured you are getting the most experienced and knowledgeable team on your aircraft.

We are standing by to assist you with every aspect of your conversion...from initial airframe sourcing right through to completion and entry into service.

CRJ Execliner Conversion Highlights:

- Airframe Sourcing
- Pre-Purchase Evaluations
- Personalized Interior Design
- Custom Interior Installation with Multiple Floorplans
- Certified Auxiliary Fuel System
- Authorized Maintenance Capabilities & Approvals
- Custom Paint Application
